

**TODD CREEK FARMS METRO DISTRICT NO1
2007 Drinking Water
Consumer Confidence Report
For Calendar Year 2006**

Public Water System ID # CO0101157

CORRECTION TO THE CCR

LIST OF POTENTIAL SOURCES OF CONTAMINATES

Esta es información importante. Si no la pueden leer, necesitan que alguien se la traduzca.

The Colorado Department of Public Health and Environment has provided us with a Source Water Assessment Report for our water supply. You may obtain a copy of the report by visiting www.cdphe.state.co.us/wq/sw/swaphom.html or by contacting JIM WORLEY at 303-637-0344.

Potential sources of contamination that may be present in our source water area come from: Fallow, small grains, pasture/hay, oil/gas wells and road miles.

The Source Water Assessment Report provides a screening-level evaluation of potential contamination that **could** occur. It does not mean that the contamination **has or will** occur. We can use this information to evaluate the need to improve our current water treatment capabilities and prepare for future contamination threats. This can help us ensure that quality finished water is delivered to your homes. In addition, the source water assessment results provide a starting point for developing a source water protection plan.

Please contact JIM WORLEY at 303-637-0344 to learn more about what you can do to help protect your drinking water sources, any questions about the Drinking Water Consumer Confidence Report, to learn more about our system, or to attend scheduled public meetings. We want you, our valued customers, to be informed about the services we provide and the quality water we deliver to you every day.
